How can you help?

1. Participate in (or organise an) on-ground protest.

On 26th January, a major day of globally coordinated actions, show your support at local physical locations, wherever you are. Either find protests happening in your city/state/country and participate in large (or small) numbers or organise one. In addition to the options below, you are encouraged to organise solidarity protests either at/near Indian Embassies, near your local Govt. offices or offices of various multinational Adani and Ambani companies. While we are focusing on the 26th, you are encouraged to continue organising gatherings as and when possible - for this is not going to end anytime soon. Do share details by email so we can update (scrapfarmacts@gmail.com).

2. More ways to participate (from 21st - 26th February, 2021)

A. #StandWithFarmers Solidarity Video

Record a video (preferably in landscape mode) to share your message of support to protesting farmers. OR Hold a poster/paper/chart/card with a solidarity message anywhere in your city/town/village and take pictures. Compilation of videos & photos will be shown to protesting farmers at different protest sites (Singhu Border & Tikri Border). It will first be projected on a screen there, and then shared on social media & other platforms around 26th January.

Email them to globalfarmersstrike@gmail.com or scrapfarmacts@gmail.com, preferably by 23rd January, 2021 (or by 25th) (even if later, we will find a way to show the farmers the same). You are also encouraged to share your photos/videos on social media and tag whoever you think should take note.

B. #AskIndiaWhy & Via Campesina Digital Campaigns on 26th January

- India has a long history of human rights violations, violence, and a cruel indifference for its most vulnerable citizens. On January 26th the government will be celebrating the adoption of its constitution with a military parade, while continuing to perpetuate harmful policies that violate their own Constitution.
India's farmers & other citizens need the global community to pay attention — the world needs to know that India is retreating from a democracy, regressing hard by rushing headlong into fascism. International focus on these protests may be the only thing preventing more state-sponsored violence and another massacre/genocide in India.

And we need your help to do this. On January 26th, we need you to...

**Participate Digitally (if not physically) on 26th January to #AskIndiaWhy. Do share photos / videos on your social media** (tag @XRebellionInd, @thepmo, your own head of state & other notables when sharing).

### 3. Other Actions

- **Contact a local Representative**
It is paramount to put international pressure on India’s Government. Click the buttons below to find templates, contact information on your local representative(s) to do your civic duty, whichever may be your country.

**Call** Your Representatives: Click here for [Call Script](#)

**Send Emails** to your govt. representatives: [Email Draft Template](#) (in English), in [Portuguese](#), in [French](#)

- **Sign Petitions**

  In less than 1 minute, sign a petition aimed at condemning state violence and demanding the Indian Government to listen to the protestors and not silence and mock their dissent.

  1. [Petition to Abolish the 3 Farm Bills & Support the Protesting Farmers](#)
  2. [Petition to UN - Freedom to express dissent is a key pillar of democracy](#)
  3. [How you can petition the UK MPs to support the farmers in India](#)

  (UK MPs are being asked to act now to support India's farmers in two ways:
  - Revise the UK approach to aid to India, including the Conceptual Framework on Agriculture and the UK-India Infrastructure Technical Co-Operation Facility (ITCF), which promotes contract farming (one of the issues the farmers are protesting about) and finances consultants to "alleviate bottlenecks to private sector investment in agriculture" in India. (Read: target small and subsistence farmers).
    [Any project that seeks to improve govt. policy like ITCF Aid should engage with grassroot movements, like farmer unions and civil society sufficiently, but it simply did not]
  - Stop exports of pesticides banned in the UK to India and other countries, including Paraquat, which is responsible for thousands of farmer deaths in India - a situation so severe that doctors in India have resorted to hunger strikes demanding a ban on its usage.)

  [Read](#) as to how there is strong interest in UK MPs on this issue and why. The UK is attempting to reform its own agricultural system as it was realised to be detrimental to tackling the climate and biodiversity crisis; it is, therefore, imperative that UK supports India so it does not go down the same path of destruction / exploitation and instead encourage good agro-ecological practices and substantially support the small & marginal farmers.

- **Divest from Ambani and Adani**

  Billionaires [Mukesh Ambani](#) and [Gautam Adani](#) manufacture wealth by working hand-in-hand with the Modi Regime to exploit the world’s people, lands and culture. They control major industries and partner up with the world’s biggest brands. Do you own products or support
companies linked to Adani and Ambani – the billionaires investing heavily in the Farm Bills?
